Partnership with Clients Drives Mutual Success

Our Clients

We work with our clients from over 50+ countries as business partners, helping them innovate, diversify and expand their business efficiently and cost effectively across markets, asset classes and customer segments

Very few firms have the global infrastructure, broad product suite, institutional-grade expertise and next-gen technology to service such a wide range of customer segments and regions

-  Banks and securities brokers (Global and Regional)
-  Asset Managers, Fund Management Companies
-  Wealth Managers and EAMs
-  Fintechs and Neo Banks / Brokers

Three Distinct Solutions Allow GTN to Serve a Broad Spectrum of Clients

GTN | TRADE

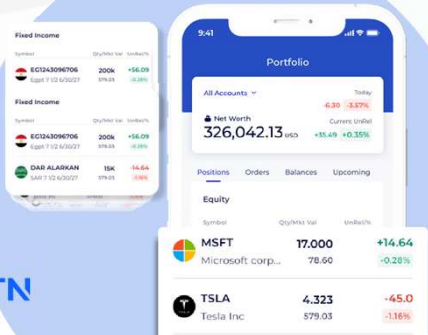

Brokers, Banks, Asset Managers, Wealth Managers

Select Clients

Jefferies S&NB Capital

- ✓ Core platform that offers global trading capabilities on B2B and B2B2C basis
- ✓ Single point of integration, counterparty relationship and execution network
- ✓ Clients are provided with a sophisticated order & execution management system ("Dealer Terminal") and a middle / back-office system for account management and reporting ("Admin Terminal")
- ✓ Co-branded web and mobile applications that enable GTN clients to offer institutional-grade trading capabilities to their end clients
- ✓ Fractional trading capabilities across asset classes

GTN | EMBED

Digital Wallets / Payments, Neo Banks / Brokers, Consumer Super-Apps

الراجحي المالية
alrajhi capital

Revolut

- ✓ Embedded finance solution that enables clients with fast go-to-market to launch and expand frictionless global investing and trading experiences
- ✓ Suite of APIs made available to inject a subset, or all, of GTN Trade and GTN Invest functionality into their own customer front-end application
- ✓ Unified infrastructure, seamlessly connected with GTN Trade & GTN Invest via APIs and widgets
- ✓ Embedded finance model is key to servicing the new frontier of financial inclusion, with micro investing and micro portfolio functionalities becoming portable and wide-ranging in their application

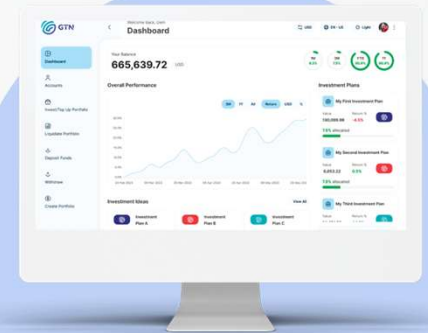

GTN | INVEST

Brokers & Asset Managers, Wealth Managers, Banks & Neo Banks and Wealth Techs

بنك السلام
Al Salam Bank

- ✓ Comprehensive end-to-end digital wealth management solution to automate the portfolio and investment management process for financial and portfolio advisors
- ✓ Modular design, with multiple integration pathways via open APIs, FIX connectivity, customer front-ends and investment office offering cloud
- ✓ Rationalized onboarding process, portfolio management, portfolio monitoring, portfolio rebalancing and administration

GTN | TRADE

Global trading platform

Access global markets through our front-to-back multi-channel platforms

From order management, execution, risk management to post-trade services – our award-winning terminals and portals provide state-of-the-art web and mobile access for all your investment needs.

Repo Services

A credit facility allowing eligible customers to borrow against blue-chip equities and fixed income assets - including treasuries, high yield and investment grade bonds - held with GTN on agreed terms.

Access to funding: Obtain cash without selling assets, preserving long-term holdings

Lower funding costs: Secured repo terms typically offer lower interest rates

Yield enhancement: Optimize cash reserves and improve returns during market volatility

Flexibility: Tailored transaction terms aligned with investment strategy

Fractionalization

Instead of buying an entire bond, invest only in its fraction.
Gain access to premium bonds, diversification, and steady income with smaller capital commitments.

Click-to-Trade

Seamless trading experience with a single click.

Fractional Ownership

Invest in fixed income securities with as little as a fraction of their face value.

Fractional Universe

Access a wide range of papers: Treasuries, Supranationals, Sovereigns, Corporates and Sukuks

Tech Integration

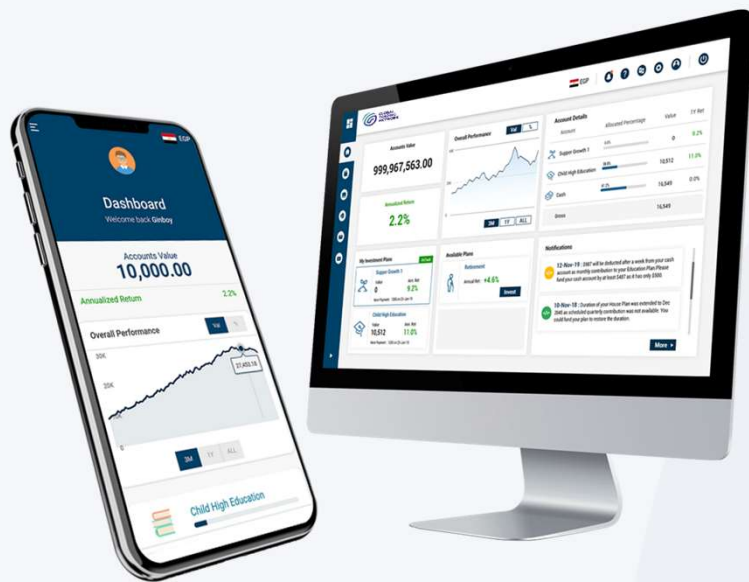

Access fractional engine through APIs and FIX connectivity

Low Minimums

Minimum starts as low as \$1

GTN | INVEST

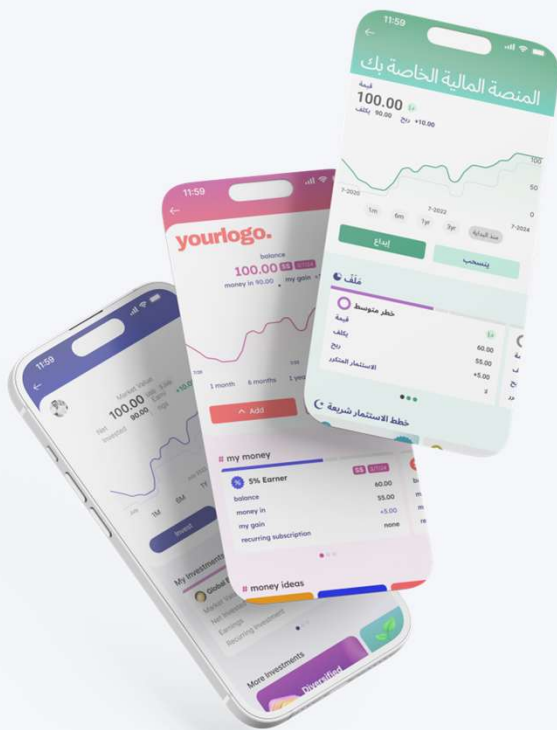

Digital wealth management

Automate the investment and portfolio management lifecycle

From customer profiling to portfolio creation and rebalancing, create model portfolios base on the customer risk profile, while monitoring and rebalancing for continued results.

GTN | EMBED

Fintech API solutions

Control the entire user experience

Build an investment solution inside your existing app by connecting to GTN's infrastructure.

Co-branded widgets to accelerate your go-to-market

API integration with your front-end and keep control of your UI/UX

Strong Customer Proposition Across the Value Chain...

Single counterparty offering providing access to **multiple markets and asset classes**, offering full services from execution, clearing and custody.

More than **2.6 million instruments** spanning various asset classes and **80+ markets**

Fractional trading in equities, spot commodities, and fixed income worldwide.
